COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

AUSTRALIA

The Australian Commonwealth, which includes the island continent of Australia and the island of Tasmania, is situated in the Southern Hemisphere, and comprises an area of 2,967,909 square miles, almost as large as the United States of America excluding Alaska.

Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes $113^{\circ} 9' E.$ and $153^{\circ} 39' E.$, while its northern and southern limits are the parallels of latitude $10^{\circ} 41' S.$ and $43^{\circ} 39' S.$

On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean. The extreme points are Steep Point on the west, Cape Byron on the east, Cape York on the north, and South-East Cape on the south.

The difference in latitude between its extreme north and south points is about 2,300 miles and in longitude between its extreme east and west points about 2,500 miles.

See Table 1, page 68, for years of formation of the Colonies and the Commonwealth, areas of the States and Territories, standard times, etc., and page 237 for major historical events.

AUSTRALIAN STATISTICS

No. 51: 1966

PREPARED UNDER INSTRUCTIONS FROM
THE HONORABLE THE TREASURER
BY
K. M. ARCHER,
COMMONWEALTH STATISTICIAN

AUSTRALIAN DECIMAL CURRENCY DOLLAR(\$)/CENT(c) SYSTEM.

On 14th February, 1966, under the *Currency Act* 1965, a dollar/cent decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in the Act, is as follows:—

- 1 pound = 2 dollars
- 1 shilling = 10 cents
- 1 penny = 5/6ths of a cent

In this issue of the Pocket Compendium monetary amounts have been converted to the equivalent amounts in the new system.

SYMBOLS AND OTHER FORMS OF USAGE.

The following symbols, where shown in columns of figures, mean—

- n.a. —not available.
- .. —nil or less than half the final digit shown, or not applicable.
- p —preliminary—figure or series subject to revision.
- r —figure or series revised since previous issue.
- n.e.i.—not elsewhere included.

A blank space in a column of figures means that the figure concerned is not yet available.

Yearly periods shown as, e.g., 1965, refer to the year ended 31st December, 1965; those shown as, e.g., 1964-65, refer to the year ended 30th June, 1965. Other yearly periods are specifically indicated.

Unless otherwise indicated, the British system of weights and measures is used.

Values are expressed in dollars(\$) or cents(c) Australian, with or without the letter A, unless another currency is specifically stated.

Any discrepancies between totals and sums of components in tables are due to rounding.

AUSTRALIAN DECIMAL COINS

Denomina- tion	Composition	Diameter (inches)	Weight (grains)
Fifty-cents . .	80 % Silver 20 % Copper	1.240	205
Twenty-cents	Cupro-nickel { (75 % copper and 25 % nickel)	1.122	174.6
Ten-cents . .		0.929	87.3
Five-cents . .		0.764	43.6
Two-cents . .	97 % copper { 3 % zinc and tin	0.850	80
One-cent . .		0.690	40

The twenty-cent, ten-cent and five-cent coins have the same weight and almost the same diameter as the florin, shilling and sixpence. The fifty-cent coin is slightly larger than a penny. The two-cent coin has a diameter midway between those of the shilling and sixpence and the one-cent coin a diameter between those of the sixpence and the threepence.

AUSTRALIAN DOLLAR NOTES

The dollar notes have been issued in denominations of \$1, \$2, \$10 and \$20. They are similar in basic colour to the notes they are replacing. Common to all dollar notes is a special watermark of Captain Cook, and a metallic security thread running down the note.

One dollar note—equal to ten shillings—is predominantly brown, with a portrait of the Queen and the Australian Coat of Arms on the front and aboriginal paintings and carvings on the back. Its size is 140 mm. by 70 mm. (approximately $5\frac{1}{2}$ inches by $2\frac{3}{4}$ inches).

Two dollar note—equal to one pound—is printed in shades of green. John Macarthur and an Australian ram are on the front and on the back William Farrer with reproductions of ears of wheat. Its size is 145 mm. by 72.5 mm. (approximately $5\frac{3}{4}$ inches by $2\frac{7}{8}$ inches).

Ten dollar note—equal to five pounds—is predominantly blue in colour with Francis Greenway and some of his architectural work on the front and on the back Henry Lawson is shown against a background of his personal letters and manuscripts. Its size is 155 mm. by 77.5 mm. (approximately $6\frac{1}{8}$ inches by 3 inches).

Twenty dollar note—equal to ten pounds—is reddish in colour with Charles Kingsford Smith and patterns of wings on the front and Lawrence Hargrave with his drawings of flying machines and kites on the back. Its size is 160 mm. by 80 mm. (approximately $6\frac{1}{2}$ inches by $3\frac{1}{8}$ inches).

6.—AUSTRALIAN PARLIAMENTS.

The Legislature of the Commonwealth and of each State except Queensland is bicameral, consisting of an Upper and a Lower House. In Queensland the Upper House was abolished in 1922. In the Commonwealth Parliament the Upper House is known as the Senate and the Lower as the House of Representatives; in the bicameral States the Upper House is known as the Legislative Council and the Lower House, in New South Wales, Victoria, and Western Australia, as the Legislative Assembly (which is also the name of the Queensland Parliament) and, in South Australia and Tasmania, as the House of Assembly.

Adult suffrage for British subjects with the necessary residential qualifications prevails in respect of both Commonwealth Houses and the State Lower Houses. Voting is compulsory. A British subject member of the Defence Forces of the Commonwealth on service outside Australia is entitled to vote at Commonwealth elections whether enrolled or not, if he has lived in Australia for six months continuously. Some property or special qualification is required for electors for the Legislative Councils in South Australia and Tasmania. In New South Wales the Council is elected by members of both Houses at simultaneous sittings, and in Victoria and Western Australia adult suffrage operates.

Membership of both Commonwealth Houses is open to adult British subjects with three years' residence in Australia and qualified as electors. In the State Lower Houses the requirements for membership are similar, but with varying periods of residence. For membership of the State Upper Houses in some States a candidate must have, as well as more general qualifications, a minimum age of 25 or 30 years.

Following modification of the bill the necessary consent was obtained at a referendum held in 1899.

9.—POPULATION: 1961 AND 1965.

NOTE.—The estimated population since 30th June, 1961, for each State represents the population ascertained from the results of the Census at that date plus natural increase and recorded net migration into each State. As complete records of interstate migration are not available, the estimated State populations since 30th June, 1961, are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions, in the past, were substantial.

NOTE.—“Classified Roads” refer to roads proclaimed or declared by Act for which the central road authority concerned assumed responsibility for part or the whole of the cost of construction and/or maintenance. Included under this heading are State highways, trunk roads and ordinary main roads, comprising about 48 per cent. of the total classified mileage for Australia, and secondary developmental, tourist, etc., roads, comprising about 52 per cent. These classifications do not apply to the two Commonwealth territories.

“Total Roads” are estimates of all roads and tracks used for general traffic, about 40 per cent. of which are constructed, the remainder being formed or natural surface only. The sources for this information are, in the main, local government authorities.

DECIMAL CURRENCY CONVERSION TABLES.

As from 14th February, 1966, under the *Currency Act 1965*, a dollar/cent currency system, with one dollar equal to 100 cents, will operate in Australia. To facilitate conversion of figures expressed in £ s. d. in this publication into dollars and cents. and for general use, conversion tables issued by the Decimal Currency Board are reproduced hereunder.

EXACT EQUIVALENTS TABLE.
CONVERSION OF AMOUNTS OF £ s. d. TO DOLLARS AND CENTS.

* Taken to nearest 5th decimal place.

The Exact Equivalents Table shows the relationships between pounds, shillings and pence, and dollars and cents as prescribed in the *Currency Act 1965*, namely:—

1 pound = 2 dollars 1 shilling = 10 cents 1 penny = $\frac{1}{8}$ of a cent.

This table should be used where it is necessary to obtain exact equivalents in decimal currency of amounts expressed in £ s. d. For example, where rates or unit prices as expressed in £ s. d. in agreements between contracting parties, this table may be used to convert them to their exact equivalents in decimal currencyⁱ

BANKING AND ACCOUNTING TABLE.
CONVERSION OF AMOUNTS OF £ s. d. TO DOLLARS AND WHOLE CENTS.

Pence	Cents	Shillings	Cents	£ s. d.	\$
1	1	1	10	10 0	1.00
2	2	2	20	11 0	1.10
3	2	3	30	12 0	1.20
4	3	4	40	13 0	1.30
5	4	5	50	14 0	1.40

10	8	10	100	19 0	1.90
11	9	1 0 0	2.00

The Banking and Accounting Table converts £ s. d. amounts expressed in whole pence to decimal currency amounts expressed in whole cents. To convert an amount of £ s. d. to dollars and cents—multiply the pounds by two—to give dollars. Add the equivalent of the shillings and pence.

e.g., £23 17s. 10d.

£23 (× 2) = 46.00

17s. 10d. = \$1.78 (from table)

£23 17s. 10d. = \$47.78

COMPREHENSIVE CONVERSION TABLE.
CONVERSION OF AMOUNTS OF £ s. d. INTO
DECIMAL CURRENCY TO NEAREST WHOLE
CENT.

The Comprehensive Conversion Table is in no sense designed to give official direction as to how prices expressed in £ s. d. should be converted into dollars and cents after the changeover to decimal currency. The Decimal Currency Board has no authority to fix prices or other charges and the Comprehensive Conversion Table merely shows the nearest whole cent equivalent of various £ s. d. amounts expressed to the nearest halfpenny. The only exceptions are threepence and ninepence where the cent equivalent is shown as half a cent below the exact value in the case of the threepence and half a cent higher in the case of the ninepence. Because the Comprehensive Conversion Table in most cases gives approximations only, it is not suitable for converting unit rates or prices. It should be used only for converting the final balance of an account or the amount due for payment by a debtor.
